# YOUR COMPETITIVE ADVANTAGE

## A limited opportunity program

Thanks to government funding, small- and medium-sized enterprises (SMEs) in Southern Ontario are being offered a key competitive advantage in partnership with the Walker Advanced Manufacturing Innovation Centre at the Welland Campus. SMEs can apply to receive a significant portion of the funding for technical service fees for projects utilizing the College's facilities, equipment, and expertise in:

- **3D PRINTING • 3D DESIGN**
- **3D MEASUREMENT & SCANNING**

Eligible projects should be focused on the integration and use of disruptive technologies in manufacturing systems, leading to the commercialization of new products. The product may be at any stage of development when the project begins.

**This is a limited opportunity program. To learn if you qualify, contact:**
