

JOB TITLE:	Computer Programmer Research Assistant (Co-op)
STATUS:	35 hours per week
DEPARTMENT:	Research & Innovation – Agriculture & Environmental Technologies Innovation Centre
Campus:	Welland
PAY:	\$14.42 per hour
CONTRACT TERM:	April– August 2021

The role of Niagara College Research & Innovation is to provide real-world solutions for business, industry and the community through applied research and knowledge transfer activities. Niagara College Research & Innovation, in partnership with business or community partners, conducts applied research projects that model or simulate solutions, develop and test prototypes, adopt new technologies and knowledge, develop and evaluate new or improved products, processes, or solutions to community issues.

Job Description

The successful candidate will work with the Agriculture & Environmental Technologies Innovation Centre team. The work includes programming, testing and troubleshooting of agricultural data management and mapping web software. The position could also involve development of web/cloud/IoT services. You will work with senior team members in Computer Programming and the Industrial Research Chair for Colleges in Precision Agriculture & Environmental Technologies.

Education

Current student of Niagara College Computer Programmer (Co-op) or Computer Programmer – Analyst.

Competency Areas

- Knowledge and experience programming with C#, .NET/.NET Core, ASP .NET/ASP.NET Core, SQL, Python, C, Docker, and/or the Angular Framework are all beneficial
- Rigorous software testing, troubleshooting, and fixes
- Programming of data analysis and adjustments to data analysis methodologies

Duties & Responsibilities

- Work on a collaborative team to accomplish various programming tasks, including:
 - Bug fixes, troubleshooting and modifications
 - Feature development and modification for in-house and company partner software
 - Contribute to the group's code base with GitLab
- Connect web software systems via API (Application Programming Interface)
- Determine the best methods to accomplish programming goals and needs
- Divide responsibilities and support other team members with their work as needed
- Discuss and recommend improvement areas for current tools
- Be self-directed and take initiative to start, test, and complete programming and testing tasks
- Applicants must be full-time students

Work Conditions:

- Contract term is April – August 2021. Work schedule is Monday to Friday from 8:30 am to 4:30 pm
- Prepared to work remotely and/or at the Welland campus
- Access to the internet, a computer and a web camera required

Email your resume, cover letter and transcript to researchjobs@niagaracollege.ca by 12:00 pm on Friday, February 12, 2021. Reference posting **COMPUTER PROGRAMMER RESEARCH ASSISTANT AETIC (Co-op)**.
